I am a passionate **front-end web developer**, I specialize in user interface development using **React**. After making a career change, I started learning web development in early 2022 and have quickly developed a solid foundation in **HTML**, **CSS**, and **JavaScript**. My portfolio includes multiple **responsive websites** and client-side rich web applications, including an **API** application using **Node.js** and **MongoDB**.

With a background as a professional photojournalist for over 8 years, I bring a unique perspective to UX design, including a strong sense of aesthetics, usability, typography, and color theory. My **detail-oriented** approach and **critical thinking** skills, honed through learning **JavaScript** and **Python** programming, enable me to effectively manage complexity, spot coding errors, and eliminate redundancies in the codebase.

## Projects

### Cake webshop - <https://bodnarb.hu/react-cakeshop>

- Single-page **React** web application featuring a dynamic product catalog powered by a **JSON** file, sorting options, and a cart system.
- Implemented a feature to display a random dessert recipe from an **API**, adding an extra layer of functionality to the project.

### Gustoso Étterem és Pizzéria - <https://bodnarb.hu/Restaurant>

- Complete website for a restaurant using **HTML**, **CSS**, **JavaScript**.
- With a weekly menu section, the current menu is provided by **API**, which is stored in a **mongoDB** database. This can be updated on a separate admin interface via a **NodeJS** application.

### Tasty Donuts - [https://bodnarb.hu/donutorder\\_bootstrap](https://bodnarb.hu/donutorder_bootstrap)

- A donut ordering page using **HTML**, **CSS**, **JavaScript** and **Bootstrap**.
- Shopping cart front-end part. (Add to cart, change quantity, delete, total value.)

### Blackjack - <https://bodnarb.hu/BlackjackJS>

- Simplified Blackjack using **JavaScript**, **HTML**, **CSS**.
- The player's cards are rendered in real time, as well as the dealer's cards at the end of the game.
